

Khaseemvali Shaik

Senior Engineer

✉ khaseemvali2011@gmail.com ☎ +91 8328058083 📍 Andhra Pradesh, India

SUMMARY

Data Engineer with 6+ years of experience in Big Data technologies, Spark, PySpark, Spark SQL, Azure and AWS Cloud, and Hadoop Ecosystem. Experienced in working with On-Prem Cloudera CDP and AWS services such as EMR, EC2, S3, Lambda, and Glue for building scalable ETL and data processing solutions. Strong expertise in SQL, Hive, Spark DataFrames, and handling structured and semi-structured data using JSON, CSV, and Parquet formats. Skilled in performance optimization techniques, Spark-Hive integration, and advanced SQL concepts including joins and window functions. Knowledgeable in Snowflake, Informatica PowerCenter, UNIX/Linux commands, and shell scripting. A quick learner and strong team player with excellent analytical, communication, and problem-solving skills.

PROFESSIONAL EXPERIENCE

LTTS, Senior Engineer 12/2024 – 08/2025 | Bangalore, India

Worked as a Data Engineer at L&T Technology Services with experience in developing and optimizing Big Data and cloud-based data processing solutions using Spark, PySpark, Hive, SQL, and AWS services. Involved in building scalable ETL pipelines, handling large datasets, performance tuning, and working with Hadoop and AWS cloud environments in Agile-based projects.

Wipro Technologies, Senior Software Engineer 04/2021 – 05/2024

Worked as a Senior Software Engineer at Wipro with expertise in Big Data and Cloud technologies including PySpark, Spark SQL, AWS, Hive, and Informatica. Involved in developing scalable ETL pipelines, data ingestion, transformation, and data mart creation for enterprise-level applications. Experienced in handling large structured datasets, optimizing Hive and Spark queries, and working with AWS S3, Hadoop, and SQL-based data processing. Collaborated with cross-functional teams in Agile environments to deliver data engineering solutions for aviation and airport management domains.

Indian Servers, Software Engineer 11/2018 – 03/2021

Worked as a Software Engineer at Indian Servers with experience in Hadoop, Hive, AWS, SQL, and Unix-based data processing environments. Involved in data extraction, transformation, and loading activities for large-scale datasets using Hive queries and SQL scripts. Worked on creating Hive tables, optimizing query performance, and migrating data to AWS S3 and Hadoop platforms. Participated in developing data processing solutions and supporting ETL workflows in a collaborative team environment.

EDUCATION

Masters of Computer Application (M.C.A.) from Nagarjuna University 2011

TECHNICAL EXPERIENCE

- Having 6+ years of IT experience in Azure Data Engineering, Big Data technologies, and ETL development.
- Strong expertise in PySpark, Spark SQL, Databricks, and Azure Data Factory (ADF) for building scalable data pipelines and transformation processes.
- Hands-on experience with Azure Cloud services and good exposure to AWS services including S3, EMR, EC2, Lambda, and Glue.

- Experienced in designing and developing ETL/ELT workflows for processing large-scale structured and semi-structured datasets.
- Proficient in data ingestion, transformation, and orchestration using ADF, Databricks, Hive, and Spark-based frameworks.
- Strong knowledge of SQL programming including joins, window functions, subqueries, DDL/DML operations, and query optimization.
- Experience in handling multiple data formats such as JSON, CSV, and Parquet in cloud and distributed environments.
- Worked extensively on Spark DataFrames, Spark-Hive integration, and performance tuning techniques including partitioning, caching, broadcast joins, repartitioning, and coalescing.
- Good understanding of Data Warehousing concepts and exposure to Snowflake and cloud-based analytics solutions.
- Experience in working with Hadoop ecosystem components such as Hive, HDFS, and Sqoop for data processing and migration activities.
- Proficient in UNIX/Linux commands, shell scripting, and job scheduling for automation and operational support.
- Worked in Agile and Waterfall methodologies with strong collaboration and communication skills across teams.
- Experience in ticketing and incident management using ServiceNow.
- Quick learner with strong analytical, problem-solving, and team collaboration abilities.

TECHNICAL SKILLS

Big Data Technologies	Spark, Spark SQL, PySpark, Databricks
Cloud Technologies	AWS, Azure
ETL & Data Integration Tools	Informatica PowerCenter, IICS, Azure Data Factory (ADF)
Programming Languages	Python, SQL
Databases	Oracle, MS SQL Server
Operating Systems	Windows, Unix, Linux

PROJECTS

Project # 1 : IMERY'S IBU

Client: Imerys

Duration: Nov 2019 – Apr 2021

Environment: Hadoop, Hive, AWS, SQL

Description: Worked on data processing and analytics solutions for mineral availability analysis using Hadoop and Hive technologies. The project focused on transforming and analyzing large datasets for business reporting.

Responsibilities:

- Developed Hive queries and managed Hive tables for data analysis.
- Processed and transformed structured datasets using Hadoop technologies.
- Worked on SQL-based data extraction and file generation.
- Assisted in data migration to AWS S3 and Hadoop platforms.

Project # 2 : GTAA

Client: Greater Toronto Airports Authority

Duration: May 2021 – May 2024

Environment: AWS, PySpark, Informatica PowerCenter, Hadoop

Description: Developed data ingestion and transformation pipelines by extracting data from RDBMS systems using Sqoop and processing it through PySpark. The transformed data was stored in AWS S3 for analytics and reporting purposes.

Responsibilities:

- Performed data ingestion from databases to Hadoop environments.
- Developed PySpark and Spark SQL transformations.
- Created Hive external tables and optimized query performance.
- Worked on AWS S3 data migration and HDFS storage management.
- Validated and transformed data based on business requirements.

Project # 3 : Skywise Application

Client: Airbus

Duration: Dec 2024 – Aug 2025

Environment: AWS, PySpark

Description: Worked on an aircraft maintenance management application for processing MPO and MPD maintenance files using PySpark and AWS technologies. The processed data was loaded into databases and used for dashboard reporting and analytics.

Responsibilities:

- Developed and maintained aircraft maintenance dashboards.
- Processed proactive and reactive maintenance data files.
- Generated reports and shared final outputs with vendors.
- Worked on cockpit dashboard development and reporting.
