

GANESH GUGULOTHU

Frontend Developer | React.js | TypeScript | Azure

gugulothuganesh06@gmail.com | 8106758489 | Hyderabad, India

PROFESSIONAL SUMMARY

Passionate Frontend Developer with 4+ years of experience building scalable, responsive, and user-centric web applications using React.js, TypeScript, Redux, and RESTful APIs. Skilled in performance optimization, reusable components, and front-end development. Proficient in Azure cloud services, Docker containerization, and MSAL authentication. Recently contributed to the GenWizard project integrating AI APIs, and eager to leverage technical expertise to deliver efficient, cloud-based, and user-friendly software in a collaborative and innovative environment.

WORK EXPERIENCE

Software Engineer | Accenture Solutions Pvt Limited

02/2022 – Present | Hyderabad, India

Project 1: GenWizard CAM (Cloud Asset Management)

- Spearheaded design and development of new features within the GenWizard platform, improving user experience and reducing operational costs for clients.
- Developed custom UI components in React.js, TypeScript, and Redux to enhance usability, performance, and maintainability, leading to a reduction in support tickets and improved user satisfaction.
- Enhanced Cloud Asset Management (CAM) features enabling seamless provisioning of cloud resources and efficient access control, directly benefiting clients such as Rio Tinto, Disney, and Australian Taxation Office (ATO).
- Integrated MSAL (Microsoft Authentication Library) for secure Azure AD-based authentication, improving application security and enabling seamless SSO for enterprise users.
- Deployed and managed application environments using Docker containers and Azure services, streamlining CI/CD workflows and improving deployment consistency.
- Added new fields and data integrations based on payloads to accommodate evolving business requirements, resulting in improved functionality and scalability.
- Improved security measures by enhancing the SSH key management system, providing users with more control over instance access and boosting system integrity.
- Reduced manual interventions and improved automation workflows by leveraging React.js, TypeScript, Redux, and RESTful APIs to create more efficient, scalable user interactions.

Project 2: Shoppocom – React.js Developer

- Built a feature-rich e-commerce platform revolutionizing online shopping with an intuitive interface and comprehensive functionalities.
- Developed using React.js and TypeScript, offering users a seamless shopping journey including product browsing, secure transactions, order tracking, and personalized recommendations.
- Designed and implemented a user-friendly, responsive UI for Shoppocom, enhancing the shopping experience through intuitive navigation and adaptive layouts.

- Utilized React.js's component-based architecture to create reusable UI components (product cards, navigation menus), improving code maintainability and development efficiency.
- Leveraged Redux for state management, ensuring consistent data flow and a seamless shopping cart experience for users.

TECHNICAL SKILLS:

Frontend:	React.js (Functional Components, Hooks), TypeScript, JavaScript (ES6+), HTML5, CSS3, Redux, React Router, Webpack, Flux, Material UI (MUI)
Cloud:	Microsoft Azure, Docker, CI/CD Pipelines, Azure AD
Authentication:	MSAL (Microsoft Authentication Library), Azure Active Directory, SSO
Tools:	VS Code, Eclipse, Git, GitHub, GitLab
Familiar:	Node.js, Enzyme, Azure Fundamentals

EDUCATION:

Bachelor of Engineering in Computer Science

2021

Gokaraju Rangarajan Institute of Engineering and Technology, Hyderabad, India

CERTIFICATIONS & ACHIEVEMENTS:

- AZ-104 – Azure Administrator
- ITIL® 4 Foundation Certification
- NPTEL Certificate – Internet of Things (IoT)

LANGUAGE:

- ENGLISH
- HINDI
- TELUGU

Date:

Place: Hyderabad
