

MANOHAR DANDU

✉ dandumanohar397@gmail.com ☎ 91-9441470225 📍 Hyderabad

PROFESSIONAL SUMMARY

- Around 4+ years of IT experience with exposure to Data Engineering, ETL workflows, Azure cloud services, production support, and data pipeline monitoring.
- Experience working with Azure services including Azure Data Factory (ADF), Azure Databricks, Azure SQL Database, Azure Storage, and Azure Data Lake.
- Good knowledge of SQL, Python, PySpark, and ETL pipeline development for data ingestion, transformation, and processing.
- Experience in handling production support activities including monitoring pipeline failures, troubleshooting data issues, root cause analysis, and performance optimization.
- Familiar with developing and maintaining scalable data processing workflows using Azure Databricks and ADF.
- Experience working in Agile environments with tools like Jira and Git.
- Strong analytical, debugging, and problem-solving skills with ability to support business-critical applications and data workflows.

PROFESSIONAL EXPERIENCE

Clean Harbours India LLP, Hyderabad

04/2025 – 09/2025

Senior Associate

- Worked on Azure-based data processing and operational support activities for enterprise business applications.
- Assisted in monitoring and troubleshooting ETL workflows, scheduled jobs, and data processing pipelines in production environments.
- Supported SQL-based data extraction, transformation, and validation processes for business reporting and operational analytics.
- Worked with structured and semi-structured datasets to ensure accurate and reliable data processing across internal workflows.
- Participated in handling data quality checks, issue tracking, root cause analysis, and incident resolution for production systems.
- Assisted in maintaining Azure-based workflows and supporting data movement activities across multiple environments.
- Collaborated with cross-functional teams to resolve data inconsistencies and improve operational reliability.
- Involved in monitoring application logs, validating batch processing results, and supporting business-critical workflows.
- Worked on Python-based automation and data handling tasks for operational process improvements.
- Participated in Agile-based support and enhancement activities using Jira and Git.

Cynosure Software Solutions

10/2022 – 04/2025

Consultant

- Worked on Azure-based data engineering and production support activities for enterprise applications.
- Developed and maintained SQL queries, stored procedures, and data transformation logic for reporting and operational workflows.

- Assisted in developing ETL workflows for ingestion and processing of structured data from multiple sources.
- Worked with Azure Data Factory (ADF) pipelines for scheduling and monitoring data movement activities.
- Supported Azure Databricks notebooks using PySpark for data processing and transformation tasks.
- Performed data validation, troubleshooting, and root cause analysis for failed jobs and pipeline executions.
- Monitored production workflows, analyzed logs, and resolved data inconsistencies in Azure environments.
- Collaborated with development and support teams in Agile methodology using Jira and Git.
- Involved in optimizing SQL queries and improving performance of recurring batch processes.
- Worked on handling structured and semi-structured data using Python and SQL-based processing.

Kfintech Technologies, Hyderabad

08/2021 – 09/2022

Associate Engineer

- Worked on financial and investment-related data processing activities for mutual fund and portfolio management systems.
- Supported data validation, reconciliation, and reporting workflows for client and transaction datasets.
- Developed and executed SQL queries for data extraction, analysis, and operational reporting requirements.
- Assisted in handling structured financial datasets including customer transactions, portfolio records, and investment-related information.
- Participated in batch job monitoring, issue tracking, and troubleshooting production support incidents.
- Worked closely with internal teams to ensure data accuracy, consistency, and timely processing of financial reports.
- Performed data quality checks and validation for large-volume transactional records across multiple business workflows.
- Supported automated reporting and backend data processing activities for financial applications.
- Involved in monitoring scheduled jobs, identifying data inconsistencies, and coordinating issue resolution activities.
- Collaborated with cross-functional support teams in maintaining reliable data operations and business continuity processes.

TECHNICAL SKILLS

Languages

- SQL
- Python
- PySpark

Azure Services

- Azure Data Factory (ADF)
- Azure Databricks
- Azure SQL Database
- Azure Data Lake Storage Gen2
- Azure Storage Accounts
- Azure Key Vault

Databases

- SQL Server
- PostgreSQL
- Oracle

ETL & Data Engineering

- ETL Pipelines
- Data Transformation
- Data Validation
- Data Ingestion
- Production Support

EDUCATION

Bachelor of Technology

2014

GIT, Gitam University, Visakhapatnam

- CGPA: 7.47

PROJECT

Enterprise Data Processing & Monitoring Pipeline

Environment:

Azure Data Factory, Azure Databricks, PySpark, SQL, Azure SQL Database, Azure Data Lake

Responsibilities:

- Worked on data ingestion and transformation workflows using Azure Data Factory and Databricks.
- Developed PySpark-based transformations for structured data processing.
- Performed SQL-based data validation and troubleshooting activities.
- Monitored scheduled pipelines and resolved execution failures.
- Assisted in optimizing ETL workflows and improving job reliability.
- Participated in production support, incident tracking, and root cause analysis activities.

DECLARATION

I hereby declare that the information provided is true to the best of my knowledge and belief.
