### CAREER GOAL

Driven Professional Seeking New Challenges and Advancement Opportunities in the Field of Technology, Database Management, Visualization, Automation & Robotics to Leverage my Expertise and Contribute to Organizational Growth and Success.

### PROFESSIONAL SUMMARY

I am a seasoned professional with over **5+** years of experience across diverse industries including Aviation, Sales, Retail & Hospitality, Banking & Finance. My expertise lies in Database Management, MSSQL, SSIS, SSRS, PowerBi, Azure ADF, SAP HANA, Excel and Automations.

My journey has been marked by a relentless pursuit of excellence and a passion for innovation. I thrive on solving complex challenges and delivering data-driven insights that empower businesses to make informed decisions. I'm committed to continuous learning and adapting to emerging technologies in this ever-evolving landscape.

Let's connect and explore how my experience and skills can drive success in your projects and organization.

#### Core skills:

**Proficient in MS SQL**

**(PAAS/On-prem)**

**SSIS**

**SSRS**

**Power BI**

**MSBI**

**Visual Studio Online (VSO)**

**Data Analytics**

**Data Mining**

**Optimization**

**Data Visualization**

**Automation**

**Robotics**

**Client Management**

**Team Management**

**Leadership skills**

**Cross Team engagement**

- Present working in **EY (Ernst & Young)** for **4+** years in Data Analytics Domain.
- Total 5+ years of professional experience in Microsoft **SQL Server**, specializing in **T-SQL, SSIS, SSRS, Power BI Desktop & Service** and Azure **ADF**.
- Strong expertise in database development, performance tuning, and data integration using SQL Server technologies.
- Extensive experience in writing complex T-SQL queries, Stored Procedures, User-Defined Functions, Views, CTEs, Indexes, and Temp Tables.
- Proficient in developing, testing, and deploying ETL packages using SQL Server Integration Services (SSIS) for data extraction, transformation, and loading from various data sources such as Excel and Flat Files.
- Hands-on experience in optimizing stored procedures and improving performance of SSIS packages.
- Experienced in generating interactive and analytical reports using SQL Server Reporting Services (SSRS), including Tabular, Matrix, and Drill-down reports.
- Strong experience in deploying and managing reports on SSRS Report Manager.
- Basic understanding of TWS job scheduling and workflow concepts.
- Good understanding of data warehousing concepts and ETL processes.
- Familiar with version control and basic scripting practices in enterprise environments.
- Having good Knowledge in **Azure, Azure Devops** and **GIT**.
- Created Pipelines, Data flows & Data sets to move the data from source to Target in Azure Data Factory.

## WORK EXPERIENCE

- Working as Senior Consultant in **Ernst & Young, Hyderabad** from May 2022 to Till.
- Worked as Software Engineer in **Data Sights, Hyderabad** from June 2021 to May 2022.
- Worked as Asst. Manager (SQL & MSBI Developer) in **BARBEQUE NATION HOSPITALITY Ltd, Bengaluru** from Jan 2021 to May 2021.

## CURRENT PROJECT

**Company** : Ernst & Young LLP.

**Technologies** : SQL Server 2019, Power BI, and Excel.

**Client** : VIATRIS [MYLAN]

**Application** : Compliance

**Duration** : Jan 2026 to till date.

### Project Summary

"Viatris is a leading global healthcare company formed through the merger of Mylan and Pfizer's Upjohn unit. The company specializes in delivering high-quality, affordable medicines across a broad range of therapeutic areas, including generics, branded pharmaceuticals, and biosimilars. Viatris is committed to improving health outcomes worldwide by ensuring access to reliable and innovative healthcare solutions."

### Responsibilities:

- Conducted compliance checks by validating test names against country-specific policies, ensuring adherence to regulatory standards across multiple regions.
- Utilized advanced SQL queries and formulas to perform comprehensive data validations and maintain data accuracy.
- Analyzed and processed large datasets from Excel files to identify discrepancies and support compliance verification.
- Leveraged Power BI features such as dashboards, filters, and drill downs to create user-friendly reports tailored to stakeholder needs.
- Developed and delivered dynamic Power BI reports to visualize compliance metrics and facilitate data-driven decision-making.
- Collaborated with cross-functional teams to align compliance processes with global healthcare regulations and company policies.
- Maintained high standards of data integrity and regulatory compliance, contributing to the successful execution of the Mylan project.
- Automated routine data validation tasks using SQL scripts to improve efficiency and reduce manual errors.
- Monitored and tracked compliance trends over time, providing actionable insights to management for continuous improvement.
- Ensured timely and accurate reporting by coordinating data collection and validation efforts across multiple country teams.

**Client** : Etihad Airways.

**Technologies** : SQL Server 2019, SAP HANA, Power BI and Excel.
